

False Flag Warning or Just Another Stupidity Attack?

By: EarthWalker, Duane Graham,

Yes, another prime time media event may be fabricated this week to gain the ire of the people. Let's go blame some poor third world country for something they could not possibly have done so we can go rape pillage and plunder this country in the name of God and occupy the land... just so we can take their natural resources and give them, beads and trinkets.

Some news sources say there are a number of disaster drills taking place right now. These drills are centered around potential disasters ranging from nuclear to bio attacks and there are people participating in these drills that are unaware that one of these "drills" is not just a drill but the real thing. These participants do not realize that they are some of the chosen few who are being placed upon the sacrificial altar for the re-election of our bungling, elitist, elected officials.

Just like the lies about the Tonkin Gulf incident, started The Vietnam War back in August 1964, the bankers will direct their corporate, muggle troops to cause another disaster so they can start yet another war, to reap the profits from both sides. Does this sound familiar?

By now, every school child should know how business is done and that the stages are set so we the people of the world are destroyed so the monopoly tyrannies of the banker families may maintain their holdings and create the markets for even more wealth.

This Tenth Anniversary Celebration of 9/11 is a sorry and shameful affair when fake rich and phony public "officials" in New York City will not let the Real Heroes, The First Responders into the ceremonies. It just illustrates how the truth is once again hijacked and serves to illuminate how pathetic these "leaders of the free world" are.

Maybe this is the NWOs plan to see just how much of this junior high school mentality it takes before we as a human beings stop reacting to the media hype and drama and stop doing what they program us to do.... ? It is time to take command of our own consciousness people!

There Must Be More This Story... The exclusion of the First Responders from such a large scale event should tell us there is something even more stupid and outrageous up their sleeves..... What the hell are these morons up to now? What is about to happen on the Tenth Anniversary?

Why aren't these courageous First Responders included in the Tenth Anniversary of The 9/11 event? Do they know the truth that shall set us free from the fabricated media ploys used to justify the invasion of Iraq and Afghanistan? Do these First Responders know about the explosions that preceded the jets running into the towers? Are the First Responders tired of keeping the truth concealed as a criminal secret?

If you hear of another horrific disaster during this "celebration" of the 9/11 event... make damn sure you stop... think... look around... and listen to common sense... before you believe anything! Trust yourself to make sure your logic is not overloaded with sensationalism and disinformation.

Confirm the logical parameters that would allow an event to occur and consult with people you know who are credible in the fields of engineering, physics and chemistry. Ask these trained people to see if such events are even possible. Just Stop and think before you accept any of this as being true... do not be so willing and ready to believe what the media is pumping into the masses.

Do not rely upon the internet or mainstream media as your only sources for information. Get out to a library and look it up for yourself. Use that old dusty encyclopedia, a physics or chemistry book to verify the facts. THINK FOR YOURSELF!

Think about who is going to profit from this event. What are they destroying and why? Is this destruction to cover up a major problem or to redirect the masses to achieve a different goal?

I do not believe these tyrants will carry out an event of this magnitude of stupidity but I would not put anything past them when they want to profit in some way. If you think they care about you just stop and think about when you decide to remodel your house... you just rip things out and replace them. You do not ask the wall how it feels or if it would like to be moved... you just knock it down.

When in Doubt..... FOLLOW THE MONEY!

I RESPECT AND ADMIRE THE REAL HEROES OF AMERICA. GOD BLESS THE FIRST RESPONDERS!
