

THE SEVENTH WAR

By Duane Graham, EarthWalker

The United States of America is currently fighting six wars and is about to engage in a seventh. This seventh war is expected by the government because the elitists have set the stage. This war is with the American People.

Our police forces have been militarized and our military has been shipped out of the country to fight wars on multiple fronts so there is no one left in our country to mind the store. Rumors of foreign troops on American soil abound and some say that Chinese troops are amassed on the borders of Mexico and Canada, poised to impose their authoritarian boot heels on the American people.

The politicians are incompetent and null as they play their silly games in Washington not knowing that the American people want them arrested for crimes against the people. The ignorance of the elected officials is overwhelming. Their disconnection from the people is so vast that Astronomical Units (AU) must be used to get a glimpse of the magnitude of the distance between the people and the puppet-like representation we have been tolerating for the past several years.

The republican and democratic parties are the laughing stock of the world and everyone knows they are the problem in Washington. American Politics, corporate lobbyists and the globalist agenda is dispensed by the UN while they use our own president to bypass our government to mandate globalist policy in the attempt to shackle the American people. Our government is almost completely nullified by the UN and bypassed by our own president.

This country has more laws than any government anywhere anytime should ever have and they keep passing still more criminal and unconstitutional laws. The smugness of these people is becoming a joke and we the people are watching them reveal their criminal acts one by one... awakening to the need to actually arrest our own government officials for stealing our tax dollars to line their own pockets and fund unconstitutional alliances with foreign criminal governments for crimes against humanity.

The systematic slaughter of indigenous people all over the world has been the standard business of governments for a long time and America has been used as the cash cow to fund these corporate wars for over a century. But now, it is coming back to bite us... now, because we trusted our intellectual experts and learned statesmen, this is about to happen to America.

The elitists in league with our own politicians are dismantling America. They want our pension funds, our social security funds and our property. The politicians and corporate whores have sold us out. They have scammed and colluded schemes and business deals to rape, pillage and plunder American Citizens. They are attempting to pull the austerity move on us by painting a disastrous picture of our economy so they can steal our hard earned money and property so they can pay off to foreign entities.

They are telling us that we are responsible for paying off the debts which they have created without the consent or the knowledge of the American people and they actually think we are stupid enough to pay

these phony debts off. Wall street, the Fed and the rest of these corporate whores should be left to starve and wither on the vine until they suffer the same fate they have inflicted upon the people of the world.

Our president is threatening to hijack our Social Security and Medicare. This is the lever he is using to get the rest of our nation to crumble and be indebted to the world bankers so they can further enslave the American people.

The American People did not make these deals with foreign bankers and we shall never consent to pay them. If the Social Security and Medicare funds are raided, the American People will rise up and force you to either attack us with your militarized police force or this militarized police force will be sent to arrest you, the congress, cabinet, your czars and the associated bureaucrats, tried and convicted for crimes against the people of the United States of America,

There is something that all elected officials should think very carefully about ... There are more of us than there are of you and you will ultimately fail no matter how much force you use against the American People. If you show or use force against the American People You Have Already Lost. This is a critical point in the history of this great country and you should either fix your mistakes or you will be arrested for them. The American People have outgrown you and they are not amused by your arrogance or smugness.

The Seventh War is your last war should you choose to betray the American People this time.

WHAT IF, WE THE PEOPLE, DECIDE TO STOP GIVING YOU OUR MONEY?
